RADOVLJICA 2018

UNIQUE OFFROAD ADVENTURE SINCE 2004

SLOVENIJA OFFROAD is traditional and unique event in Slovenia and nearer region, dedicated to all who love offroad driving. It was first organized in 2004 and every year it attracts more than 5.000 visitors. From 2016 SLOVENIJA OFFROAD has been moved to a new location, gravel pit Graben in Radovljica. Its terrain with small lakes, overhangs and jumps enables more attractive tracks for drivers and more interesting overview for visitors who can also observe the race on a big screen.

SLOVENIJA OFFROAD 2018 will be offroad competitions in three different disciplines. The speed track competition can be joined by amateur drivers of road legal SUV cars. The length of the track is around 1000 meters and drivers have to compete in two timed drives. 30 of the fastest drivers qualify for the final round.

The hard track is suitable only for specially adapted offroad cars with rollbar cage. Drivers will compete on a track with various obstacles in best of three timed drives. First will be held on Saturday evening, second and third on Sunday morning. It is very attractive for visitors and, of course, very exciting for drivers and their cars.

The third discipline is soft trial with short distance slalom.

All three races count for Slovenian national offroad championship. Beside the competition, there are many additional attractions for visitors, possibility of test drives with Jeep SUVs and display of specialized vehicles of local firefighter units and Slovenian army.

The event is covered by many media representatives with published texts and photos in newspapers or videos on TV and internet.

You are kindly invited to SLOVENIJA OFFROAD 2018, March 10th-11th 2018 in Gramoznica Graben Radovljica.
